

"Hang On"

Continuing where it left off last year, the Swift and it's 2 cams get you moving with ease. Effortless freeriding make this sail a magazine test favorite. Early planing combined with top speed stability deliver the novice to advanced freerider a combination that will put a smile on his face. A new size flow with a 6.5 and 7.0 replace the 6.8 to give more options to this great range.

DESIGN DEVELOPMENT

- **Twin cam performance**
- **Direct power to plane**
- **Shape lock enhancements**
Keep draft stable
- **Triangulated load bearing panel layout**
Gives the most strength to weight ratio

**Tim Congdon,
Intermediate Sailor, Great Lakes:**

"The Swift really excels in the flat water gusty lake conditions I sail in. I have been freeriding for 25 years and I have never been so impressed with twin cam performance!"

Size	Kg	Mast	IMCS	Luff	Boom	Base	Batten	Head / Top	Cams	Recommended Mast
